Every Page Has Text

Every Page Needs Fonts

Every Page Needs Typography

What is Typography?

Typography gives text *structure*

– Jan Middendorp's *Shaping Text*

Let's prove it!

Typography gives text *structure*

Google Fonts

A web with web fonts is more beautiful, readable, accessible and open.

Google Fonts makes it quick and easy for everyone to use web fonts, including professional designers and developers. We believe that everyone should be able to bring quality typography to their web pages and applications.

Our goal is to create a directory of web fonts for the world to use. Our API service makes it easy to add Google Fonts to a website in seconds. The service runs on Google's servers which are fast, reliable and tested. Google provides this service free of charge.

Open Source Fonts

All of the fonts are Open Source. This means that you are free to share your favorites with friends and colleagues. You can even customize them for your own use, or collaborate with the original designer to improve them.

And you can use them in every way you want, privately or commercially — in print, on your computer, or in your websites.

We are working with designers around the world to publish quality typeface designs that are made for the web. If you are a type designer and would like to discuss this, please get in touch.

Many of Google's own web pages are already using Google Fonts

This screenshot shows the Google Play Store search results for the query "sinhala" with the language set to English. The results are displayed in a grid format with 6 columns and 5 rows. Each result includes the app icon, name, developer, rating, and price status (FREE). The apps cover various categories such as utility, news, education, and entertainment. Notable apps include "Lanka ID Card Info" by Ruhaim Izmeth, "Pariganaka" by Magzter Inc., and "Hiru News - Sri Lank" by Bhasha Lanka (Pvt) Ltd. The interface is in English, though the apps themselves are primarily in Sinhala.

Public Development

github.com/mooniak

The screenshot shows a GitHub Issues page for the repository "moonik/stick-no-bills-font". The page displays a list of open issues, each with a title, labels, and a brief description. The issues are:

- need review (design, enhancement, help wanted) - #25 opened 4 hours ago by kosalaya
- Ya Review - #24 opened a day ago by kosalaya
- Sinhala Level 1 draft (design, regular) - #23 opened on Apr 23 by pathumego (Release 1.1.1)
- jii and gj OTF substitutions (design, enhancement) - #20 opened on Apr 22 by pathumego (Release 1.1.1)
- Sinhala Developemnt - #18 opened on Apr 19 by pathumego
- rf rt Alternatives (design, enhancement, otl) - #15 opened on Apr 4 by pathumego (Release 1.1.1)
- Bold Style - #13 opened on Apr 4 by pathumego (Release 1.1.1)
- Use OTL for caps punctuations (enhancement, otl) - #8 opened on Mar 19 by pathumego (Release 1.1.1)

The page includes standard GitHub navigation elements like "Issues", "Pull requests", "Labels", and "Milestones" tabs, a search bar, and a sidebar with repository statistics.

Glyphr Studio.com

(Not a Google Project)

The image shows a screenshot of a web browser displaying the Glyphr Studio website. The title bar reads "Glyphr Studio - font design" and the address bar shows "glyphrstudio.com". The main content features a large blue "glyphr" logo with "STUDIO" below it, and a "VERSION ONE!" badge. Below the logo, the text "check it." is displayed. A central message states: "Glyphr Studio is a free, web based font designer. Version 1 is here!". Another message explains: "Font design has a high barrier of entry. Professional font design programs are very complex, and/or quite expensive. Glyphr Studio is streamlined and made for font design hobbyists... and it's free!". At the bottom left, there is a "TEST DRIVE CONTROLS" sidebar with options like "font size (px)" set to 150, "96dpi font size (px)" set to 112.5, "line gap (em units)" set to 250, "glyph spacing (em units)" set to 0, and checkboxes for "show glyph boxes" and "show baseline". A "generate png file" button is also present. To the right, a "TEST DRIVE" area shows sample text: "finally a dozen boxing liquor waffle coffins". Below this, a larger text area displays the words "finally a dozen" in a large, bold, black font.
