

# Typography gives text *structure*

## Google Fonts

A web with web fonts is more beautiful, readable, accessible and open.

Google Fonts makes it quick and easy for everyone to use web fonts, including professional designers and developers. We believe that everyone should be able to bring quality typography to their web pages and applications.

Our goal is to create a directory of web fonts for the world to use. Our API service makes it easy to add Google Fonts to a website in seconds. The service runs on Google's servers which are fast, reliable and tested. Google provides this service free of charge.

## Open Source Fonts

All of the fonts are Open Source. This means that you are free to share your favorites with friends and colleagues. You can even customize them for your own use, or collaborate with the original designer to improve them.

And you can use them in every way you want, privately or commercially — in print, on your computer, or in your websites.

We are working with designers around the world to publish quality typeface designs that are made for the web. If you are a type designer and would like to discuss this, please get in touch.

Many of Google's own web pages are already using Google Fonts

This screenshot shows the Google Play Store search results for the query "sinhala" with the language set to English. The results are displayed in a grid format with 12 items per row. The categories shown are Apps and Movies. The apps listed include various utility, news, navigation, and educational tools, all related to the Sinhala language or culture. Many of the apps are free, as indicated by the "FREE" label next to their names. The app icons are visually distinct, often featuring traditional Sinhala characters or cultural symbols like the Dharmachakra.

The screenshot shows the Sri Lankan Government website ([www.gov.lk](http://www.gov.lk)) in a web browser. The page features the official crest of Sri Lanka at the top left, followed by the text "ලේඛ. රජය. ලංකා" and "එස්. සේවා පැහැදිලි". A large banner image of a traditional building is visible at the top right. Below the header, there's a navigation bar with links like "ලේඛ පෙනෙන", "සූචිත හෝ අදාළකරණ", "විකාරණ", and "අභ්‍යන්තරයේ". A search bar is located on the far right.

The main content area contains several news items in Sinhala, each with a small thumbnail image and a brief summary. One news item is titled "ලංකාවේ රුඩී වෙනුවේ දායාත්මක නොවැමිවා" and features a photograph of a group of elephants in a natural setting.

On the right side of the page, there's a section titled "ප්‍රධානත්" with a photo of two men shaking hands, and another titled "මෙ විෂාල" with text from the UN e-Government Development Index report.

At the bottom of the page, there's a weather forecast for Colombo, which includes a small icon of a sun and rain, the text "කොළඹ නේ අනුව සෑවන", and the dimensions "260px x 44px". A developer tool's element inspector is overlaid on this part of the page, showing the HTML structure and CSS styles applied to the weather icon.

Below the page content, the browser's developer tools are open, showing the "Elements" tab selected. The "Styles" panel on the right lists various CSS rules for different elements, such as "element.style { border: 0px none; }" and "img { border: 0px none; }".
